Company profile

企业简介

China's first company listed on the NEEQ Innovation Tier [Stock Code: 838357]

Leading Enterprise in Intelligent Mechanical Parking Equipment

Intelligent Parking New Ecosystem Solution Provider

Chairman Su Nong--National High-Level Personnel of Special Support Program

Contributor to national industry standards for parking equipment

Winner of the 25th China Patent Award

60,000m² Domestic Smart Manufacturing Base + African Smart Manufacturing Base

24/7 Round-the-clock Technical Service

Guangdong Sampu Technology Co., Ltd. [Stock Code: 838357] is the first listed company in the NEEQ Innovation Layer for mechanical parking garages in China, and is a leading enterprise in China's mechanical parking equipment industry and one of the national standard compiling entities for the parking equipment industry.

Mr. Su Nong, Chairman of the company, is an expert of the National Ten-Thousand Talents Program, an Innovation Leading Talent recognized by the Ministry of Science and Technology, and a deputy to the Guangdong Provincial People's Congress. Leading the R&D team, he adheres to independent research and development to achieve technological breakthroughs, obtaining over 200 authorized and published patents, including more than 70 invention patents. In 2025, the company won the 25th China Patent Award. In 2011, it obtained the industry's first patent for a rechargeable mechanical parking garage, achieving mass production in 2016. Its AI-powered mechanical parking garage developed in 2019 was certified as a First Set of Major Technical Equipment in Guangdong Province.

Since its establishment on November 12, 2008, adhering to the corporate mission of "Making Parking No Longer Difficult for Chinese People", the company has been deeply rooted in the static traffic industry. It boasts an Enterprise Academician Workstation and the Guangdong Engineering Technology Research Center for Mechanical Parking Systems. The company holds two Guangdong Famous Trademarks, has been recognized as a Guangdong Famous Brand Product, and has been honored as a Contract-Honoring and Trustworthy Enterprise for twelve consecutive years by the Guangdong Provincial Administration for Industry and Commerce.

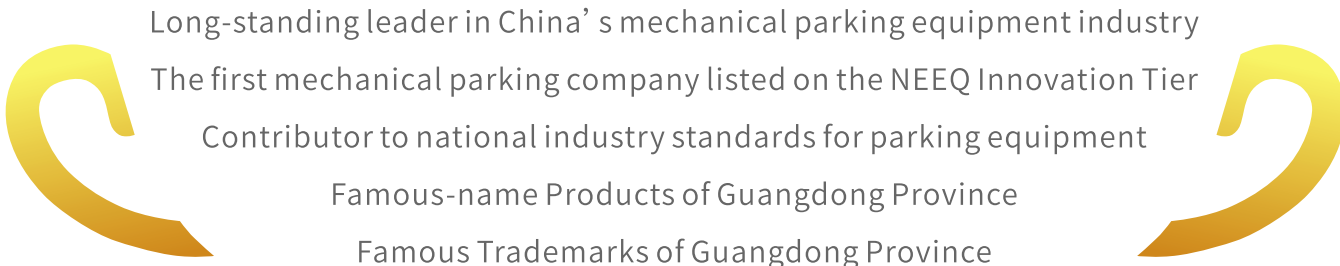

In 2022, Sampu was recognized as a Specialized, Sophisticated, Unique, and Innovative Enterprise and a Guangdong Provincial Innovative Enterprise for its outstanding specialization, professionalism, distinctiveness, and innovation capabilities. The company is committed to advancing the upgrading of industrial foundations and the modernization of industrial chains, enhancing the competitive advantages of the manufacturing sector, and fostering a new development pattern. It is poised to become a pivotal force in driving the development of industrial and supply chains with greater innovation capacity, higher added value and better safety and controllability in the future.

Sampu aims to "create the top brand of mechanical parking garages", dedicating itself to achieving zero failures and zero defects in its products. In terms of safety, Sampu pioneered the "Triple Safety Guarantee System" comprising mechanical fall prevention, structural compression resistance, and damping force dissipation, thoroughly safeguarding the parking safety of every vehicle and genuinely providing customers with a safe, worry-free parking experience throughout the entire process.

Sampu's high-tech intelligent mechanical parking garages are fully equipped with unattended operation capabilities. You can effortlessly park and retrieve your vehicle with a single touch, or through automatic license plate recognition, QR code scanning, or even facial recognition technology.

Honorary Patent

荣誉专利

- Long-standing leader in China’s mechanical parking equipment industry
- The first mechanical parking company listed on the NEEQ Innovation Tier
- Contributor to national industry standards for parking equipment
- Famous-name Products of Guangdong Province
- Famous Trademarks of Guangdong Province
- Provincial Enterprise Technology Center
- Winner of the 2025 China Patent Award
- High-tech Enterprises
- Guangdong Doctoral Workstations
- Specialized and Sophisticated SMEs
- Guangdong Academician Expert Workstations
- Contract-Abiding and Trustworthy Enterprises for 12 consecutive years
- Guangdong Technical Research Center for Intelligent Mechanical Parking

Outstanding enterprise in the national mechanical parking equipment industry for ten consecutive years
Top 20 companies in national sales / Vice President Unit of China Parking System Manufactures Association
AAA-rated Credit Enterprise / Six-Year A-Level Taxpayers/Top 10 manufacturer of mechanical parking systems in China

Over two hundred patents ensure the sustainable development of Sampu's products and equipment.

Equipment Type

设备类型

Semi-automatic Products

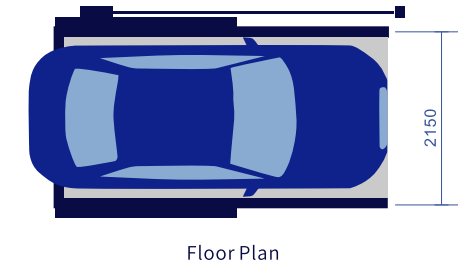

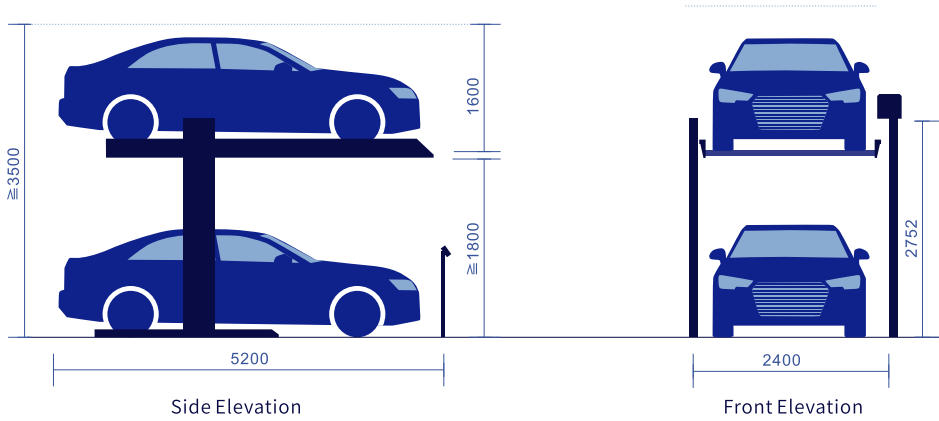

PJS Simple Lifting

- The ground floor can directly park vehicles without requiring a car pallet;
- Limited parking space can accommodate multiple vehicles; simple and compact structure;
- Fast installation; easy to relocate and reinstall; single or multiple units available based on ground conditions;
- Installation requires only ≥200mm thick concrete on the ground, with no need for excavation or foundations.

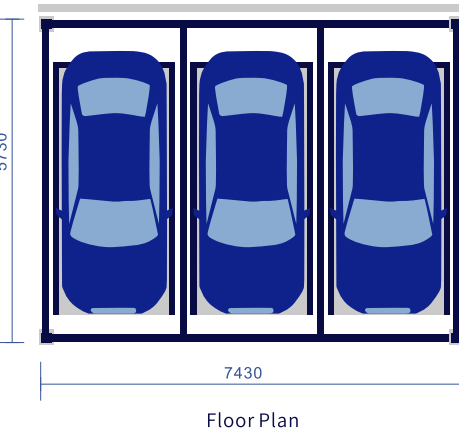

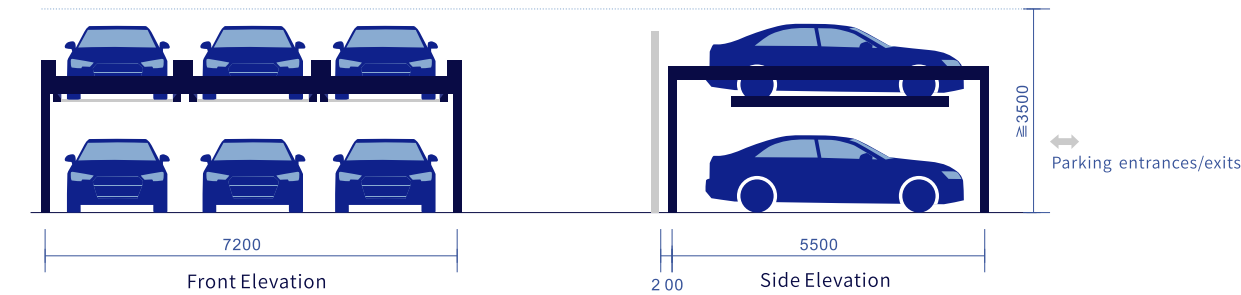

基本参数	Basic Specification
Buildable Floors	2 Floors
Floor Area	Approximately 13m ² per unit
Number of Parking Spaces	1 ground space can accommodate 2 vehicles, 3 spaces for 6 vehicles
Vehicle Retrieval Time	Approximately 25s
Installation Clear Height	3.5m (minimum clearance)

Two-column Single-unit Simple Lift

Four-column Frame Simple Lift

Equipment Type

设备类型

Semi-automatic Products--PSH

Two-level Lifting and Traversing System

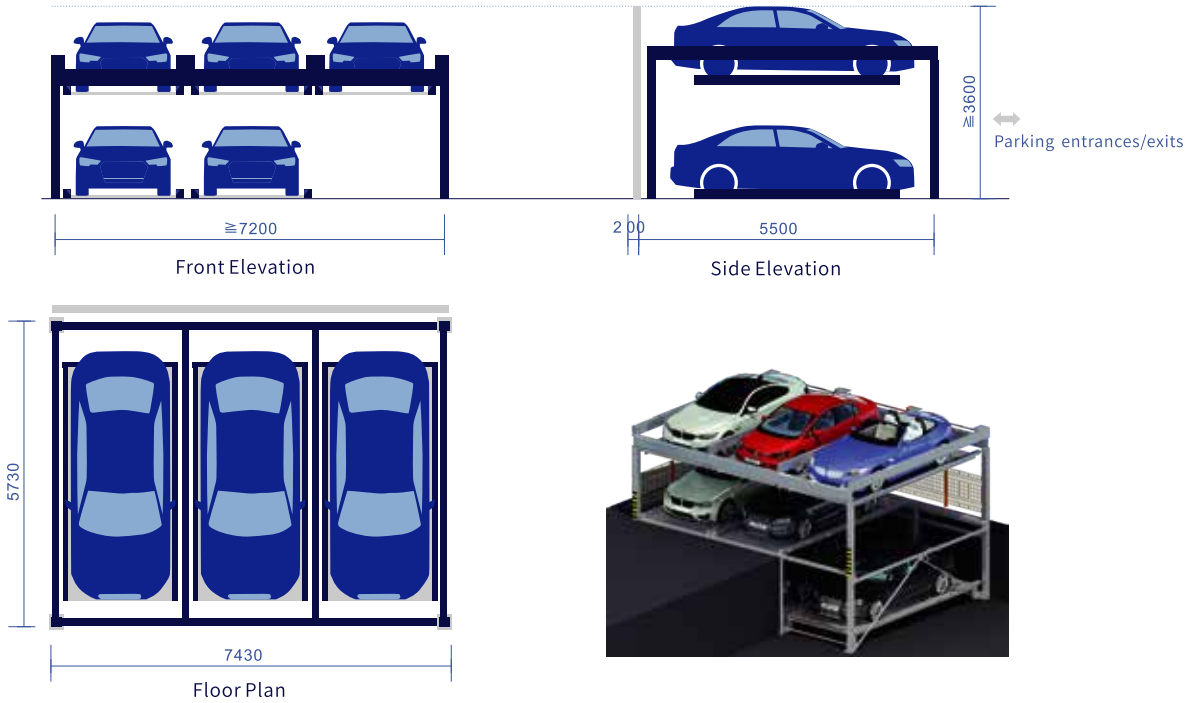

- Simple structure, standardized design, fast installation, mature operation;
- All ground spaces serve as parking entrances/exits for shorter queuing time;
- Available in above-ground and pit-style configurations. The above-ground version can be constructed with 2 to 6 tiers as needed.

Scan to Watch Video

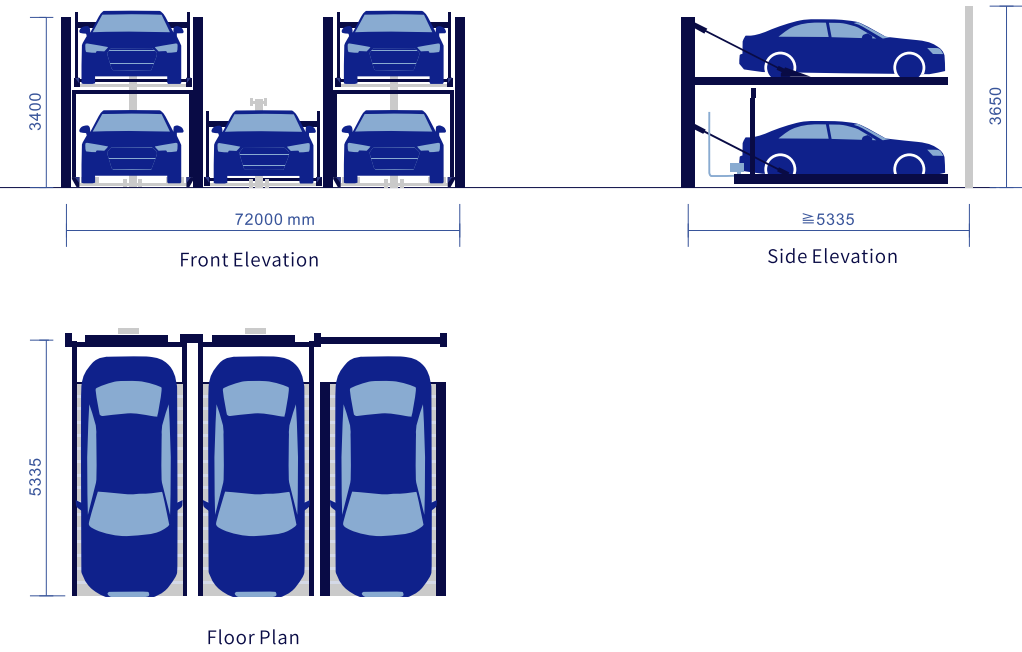

基本参数	Basic Specification
Buildable Floors	2 Floors
Floor Area	Approximately 40m ² per set
Number of Parking Spaces	3 ground spaces can accommodate 5 vehicles 6 ground spaces can accommodate 11 vehicles
Vehicle Retrieval Time	Average 45s
Installation Clear Height	3.65m (minimum clear height)
Supporting Facilities	Charging equipment can be added later

Two-level Lifting and Traversing System

Two-level Hydraulic Lifting and Traversing System

Equipment Type

设备类型

Multi-level Lift and Traverse System--PSH

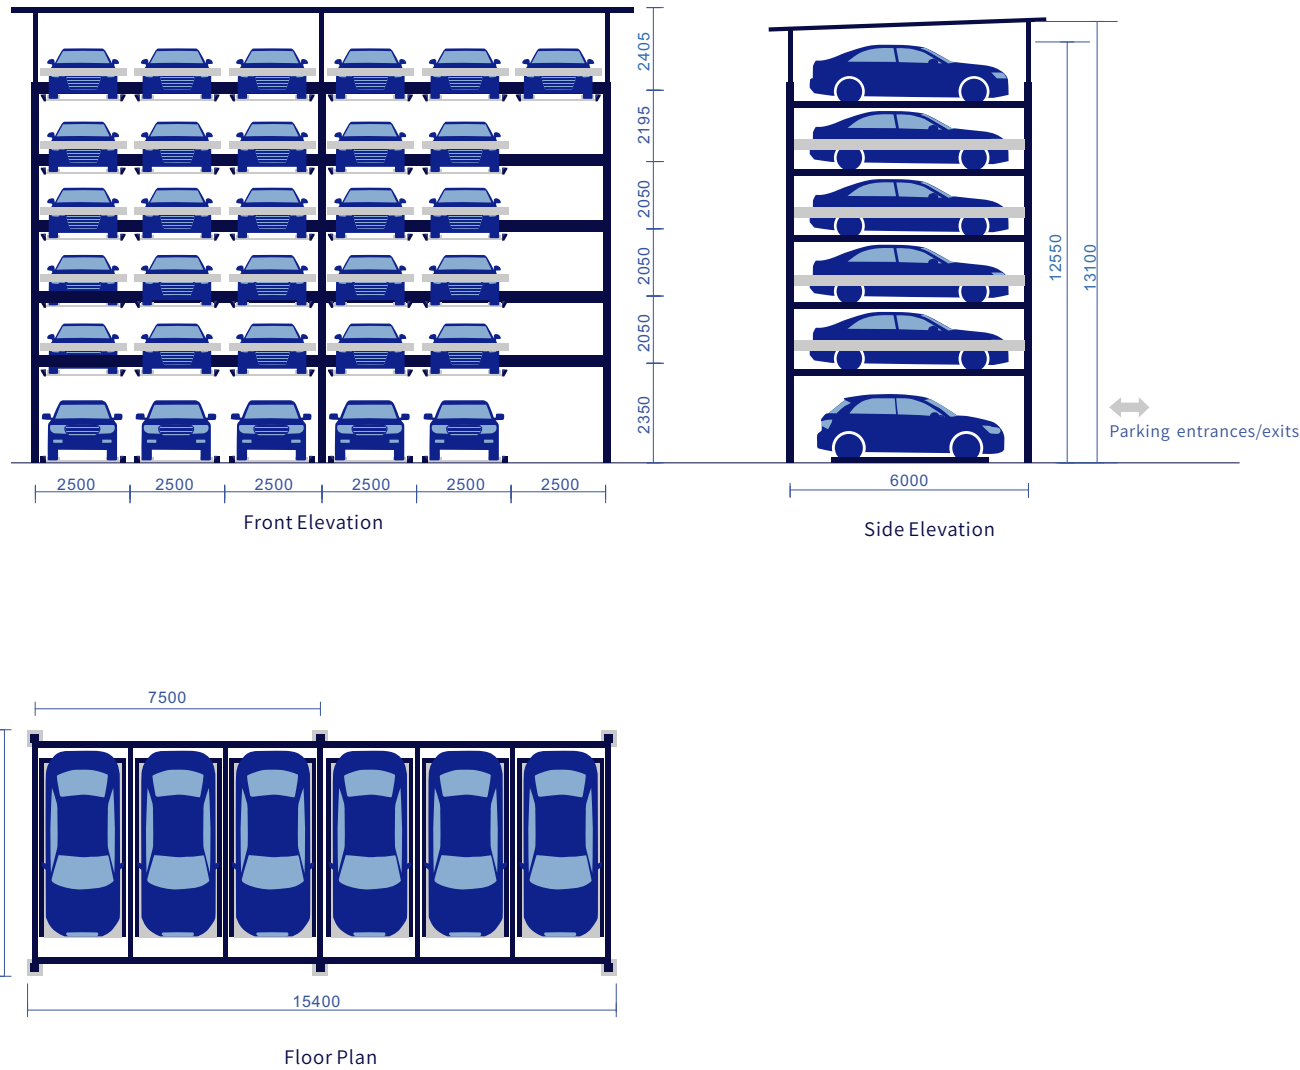

- Short construction period, no dedicated operator required; widely applicable, often suitable for government agencies and institutions;
- High cost-effectiveness, simple structure, intelligent system optionally available.

基本参数	Basic Specification
Buildable Floors	3-6 Floors
Floor Area	Standard six-column configuration approximately 95m²
Number of Parking Spaces	6 floors can accommodate 31 vehicles
Vehicle Retrieval Time	Average 120s
Supporting Facilities	Charging equipment can be added later

Semi-automatic Product

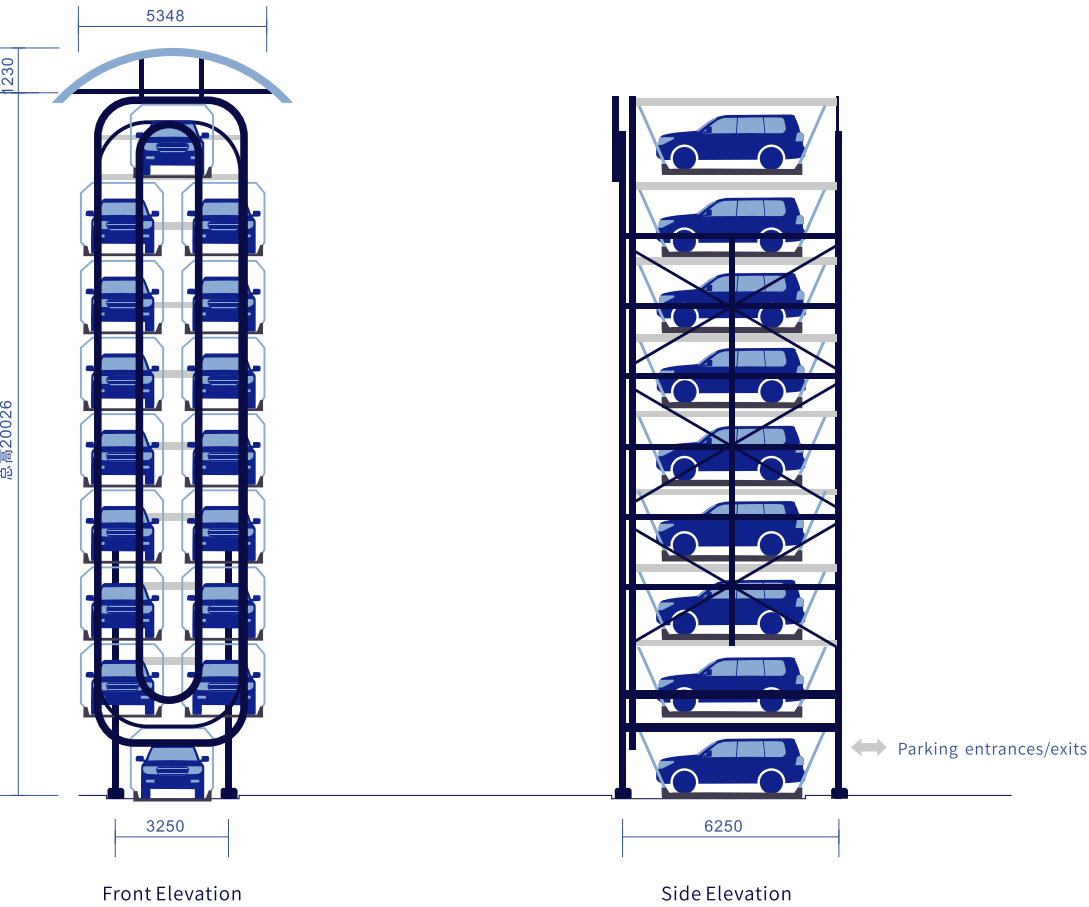

Vertical Circular Parking Equipment-PCX

设备特点	Characteristics	Equipment
■	Short installation period, achieving 12-20 parking spaces in the area equivalent to 2.5 standard parking spaces;	
■	Niche product, suitable for small corner or areas, flexible and distributed installation.	
基本参数	Basic Specification	
Buildable Floors	7-11 floors [Suitable for all vehicle types]	
Garage Capacity	Approximately 37.8㎡ per set [9 floors can accommodate 16 vehicles]	
Vehicle Retrieval Time	Average 90s	

Vertical Circular Parking Equipment

Vertical Lifting Equipment--Parking Tower

- Equipped with a central hoistway, park the vehicle at the hoistway entrance/exit, the hoist lifts the vehicle to a high level, and the traversing comb frame moves it to the parking space;
- Suitable for constructing above-ground garages with 5 to 25 floors, with variable frequency ultra-high speed hoisting motor enabling fast vehicle retrieval;
- Particularly suitable for small-area, high-capacity parking in cities.

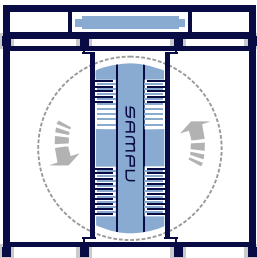

基本参数	Basic Specification
Buildable Floors	7-25 layers
Floor Area	Approximately 50m² per set
Number of Parking Spaces	25 floors can accommodate 50 vehicles
Vehicle Retrieval Time	Average 60s, maximum 90s
Lifting Speed	Up to 120m/min, i.e., 2 meters per second
Parking Method	Automatic turnaround turntable, no need to reverse into the parking space

High-speed Tower

Vertical Lifting Equipment--Parking Tower

设备特点

Characteristics

Equipment

- High-capacity vehicle storage;
- Utilizes one shared lifting channel for vehicle storage, (e.g., 5 rows with 2 channels, or 7 rows with 3 channels) significantly increasing parking density.

基本参数

Basic Specification

Buildable Floors	5-15 Floors
Floor Area	Approximately 88㎡ per set [10 floors can accommodate 39 vehicles]
Number of Parking Spaces	One lifting channel for every five ground parking spaces

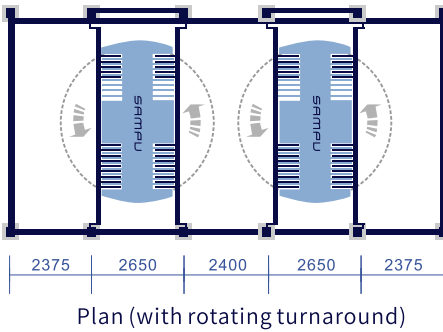

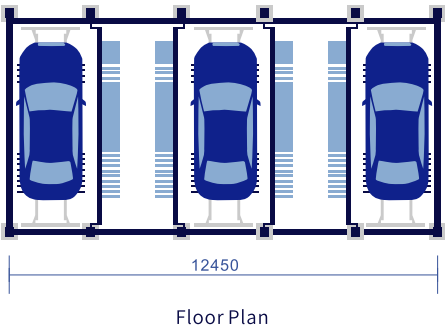

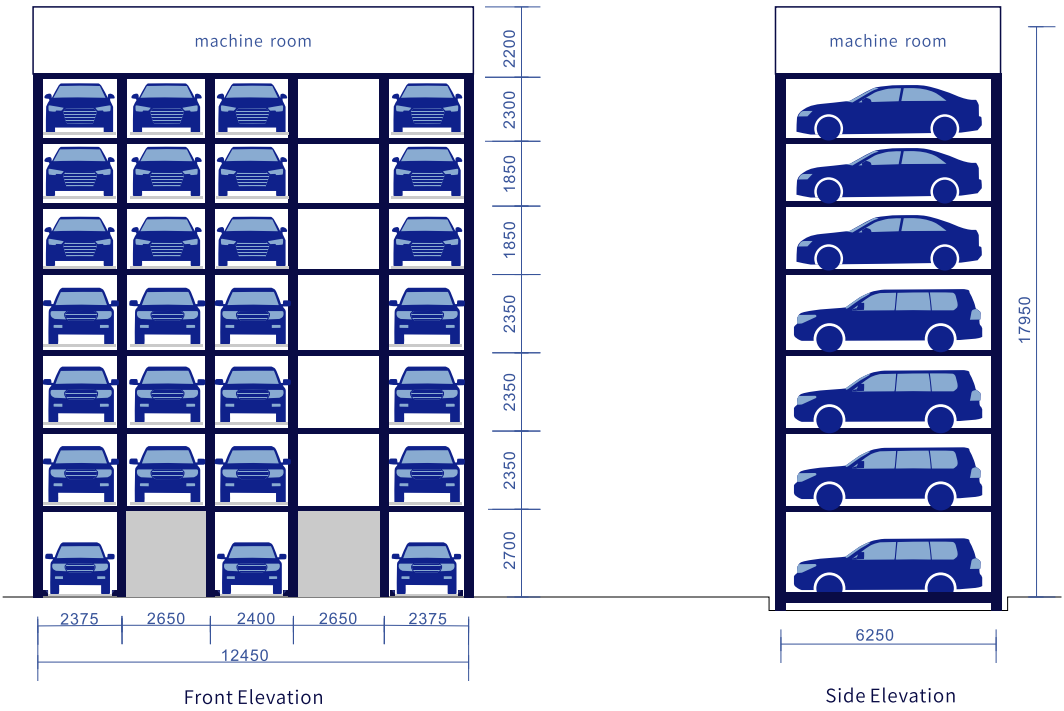

Vehicle Retrieval Time	Average 70s, maximum 100s
Parking Method	Each tower is equipped with 2 entrances/exits, with optional turntable

Vertical Lifting Equipment--Large Cabin

Scan to Watch Video

设备特点 Characteristics Equipment

- Intelligent Handling Device of Rail Guided Vehicle (RGV) Manipulator;
- Integrated vehicle storage and retrieval achieved through "robotic handler";
- Combination of tower garage and warehousing product, offering ultra-fast handling + high-density parking.

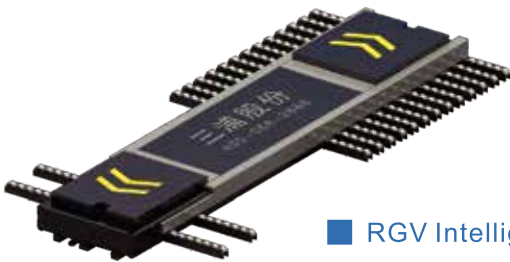

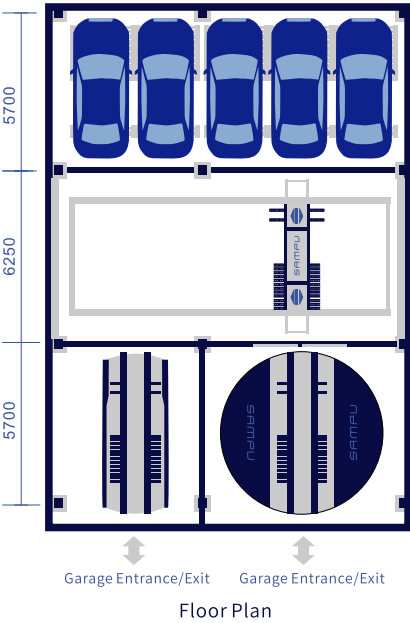

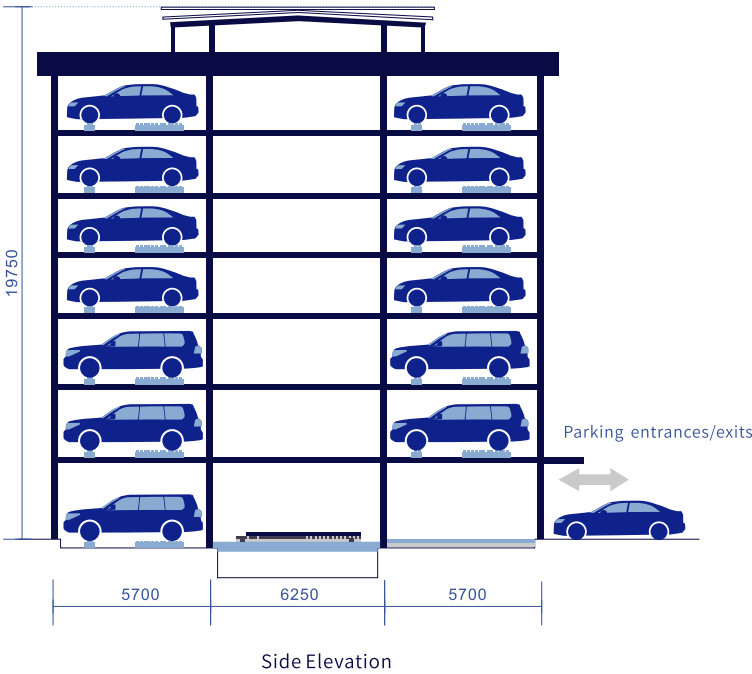

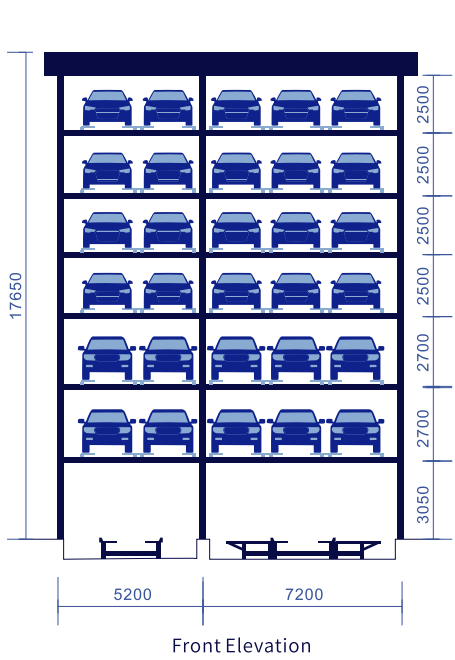

基本参数 Basic Specification

Buildable Floors	5-15 floors
Intelligent System	Full Automatic Intelligent Control System
Vehicle Retrieval Time	Maximum storage/retrieval time for 7 floors about 100s

Parking Method	180° Rotating High-speed Turnaround Turntable
Parking entrances/exits	can be set up on all four sides of the garage

Large Cabin

RGV Intelligent Handler

The intelligent handler is an all-in-one robot that integrates functions such as lifting vehicles, horizontal and vertical movement, handling and lifting with mechanical horizontal alignment, automatic vehicle centering, fixing, and releasing.

Equipment Type

设备类型

Fully Automated Product--PCS

Vertical Lifting Equipment--Roller

Scan to Watch Video

设备特点 Characteristics Equipment

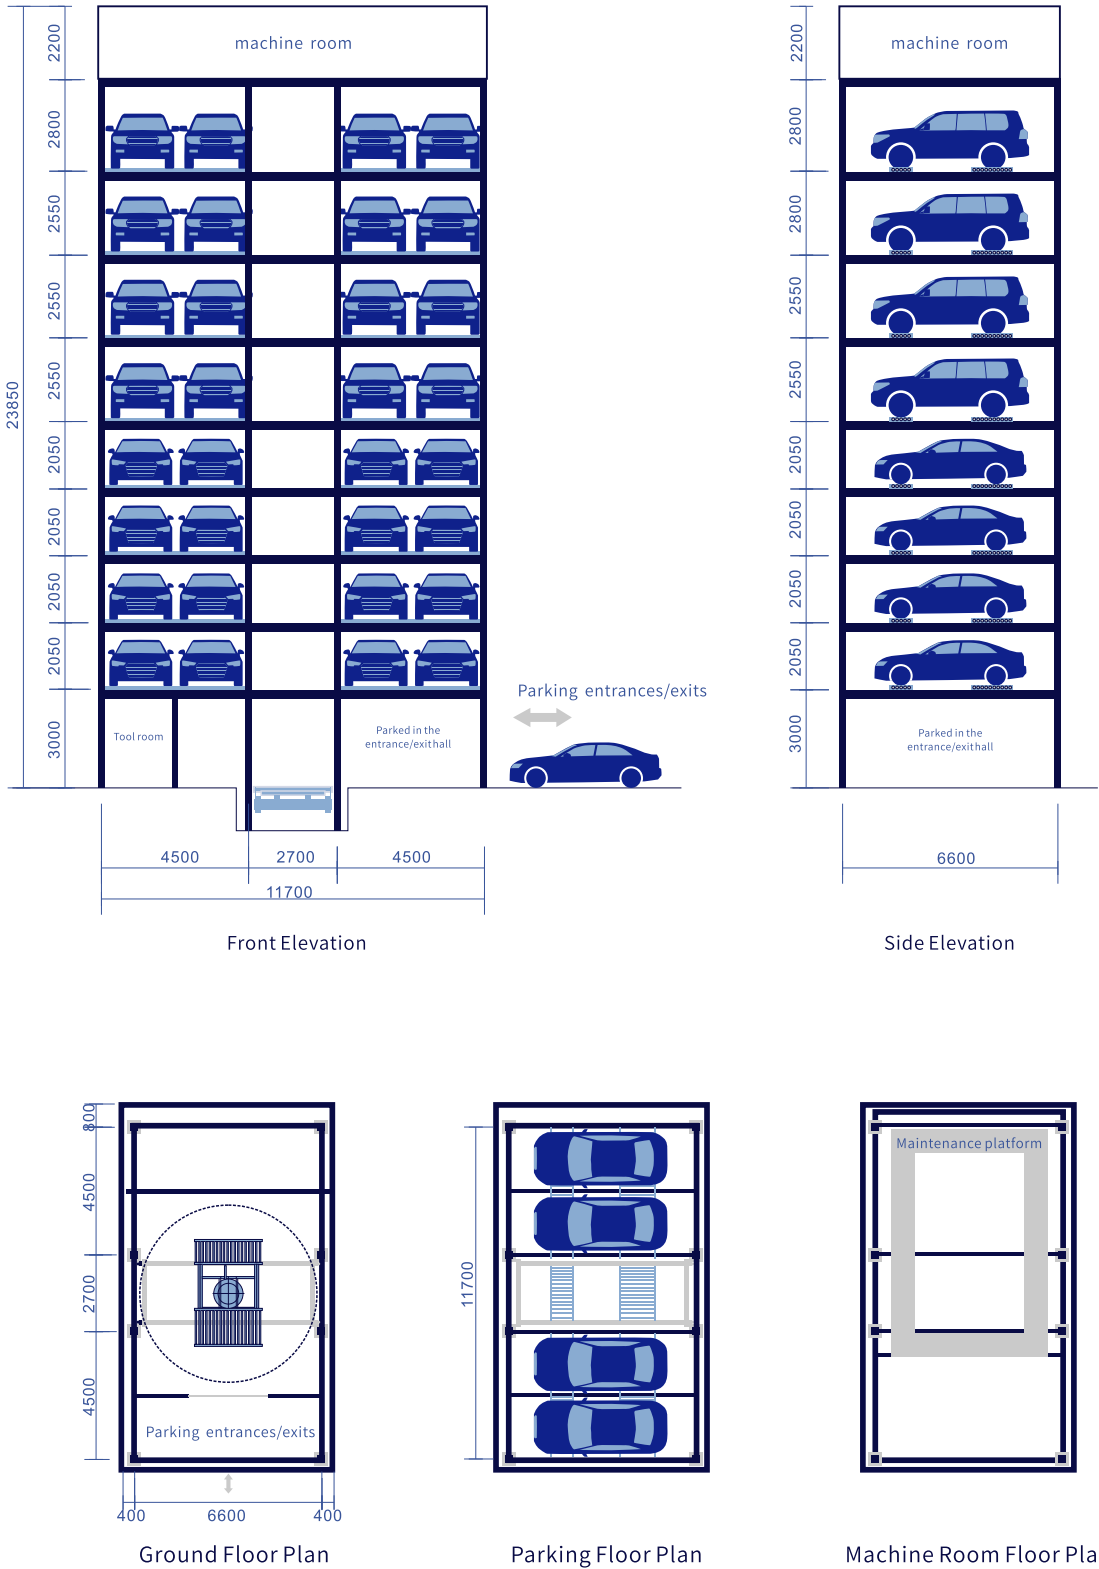

- Small footprint with spacious vehicle storage/retrieval halls;
- Fewer steps in vehicle storage/retrieval, saving time and ensuring efficiency;
- Only the rollers on each independent parking space roll to pull the vehicle to move.

基本参数 Basic Specification

Buildable Floors	7-15 floors
Intelligent System	Full Automatic Intelligent Control System
Vehicle Retrieval Time	Average 70s, maximum 100s
Parking Method	Automatic turntable, no need to reverse into parking space

Large Cabin

Horizontal Moving System-PPY

- Using the principle and structure of a stereoscopic warehouse, each floor is equipped with an intelligent vehicle carrier to complete vehicle storage and retrieval through horizontal and vertical movements;
- Vehicles are parked in the entrance/exit hall, and the entire storage and retrieval process is completed by automatically by the mechanical handling system. The turntable automatically turns the vehicle around during retrieval;
- Suitable for garages with 2 to 7 above-ground floors, and can also utilize underground spaces from B1 to B4 floors to install vehicle storage facilities.

基本参数	Basic Specification
Buildable Floors	-4 to 7 floors
Level of Intelligence	Compatible with all intelligent operating systems Fully intelligent unmanned operating system, capable of setting up multiple entrances/exits
Environmental Requirements	Ground floor can be used for commercial purposes or added to existing buildings
Vehicle Retrieval Time	Average 80 seconds, maximum 120 seconds

Horizontal Moving System

Equipment Type

设备类型

Fully Automated Product--PSH

设备特点 Characteristics Equipment

- High level of intelligence, requiring no dedicated operator;
- Card-free operation, retrieve vehicle with one touch on the screen.

基本参数 Basic Specification

Buildable Floors	3-6 floors (Suitable for all vehicle types)
Garage Capacity	Approximately 78m ² per set (Six floors can accommodate 24 vehicles)

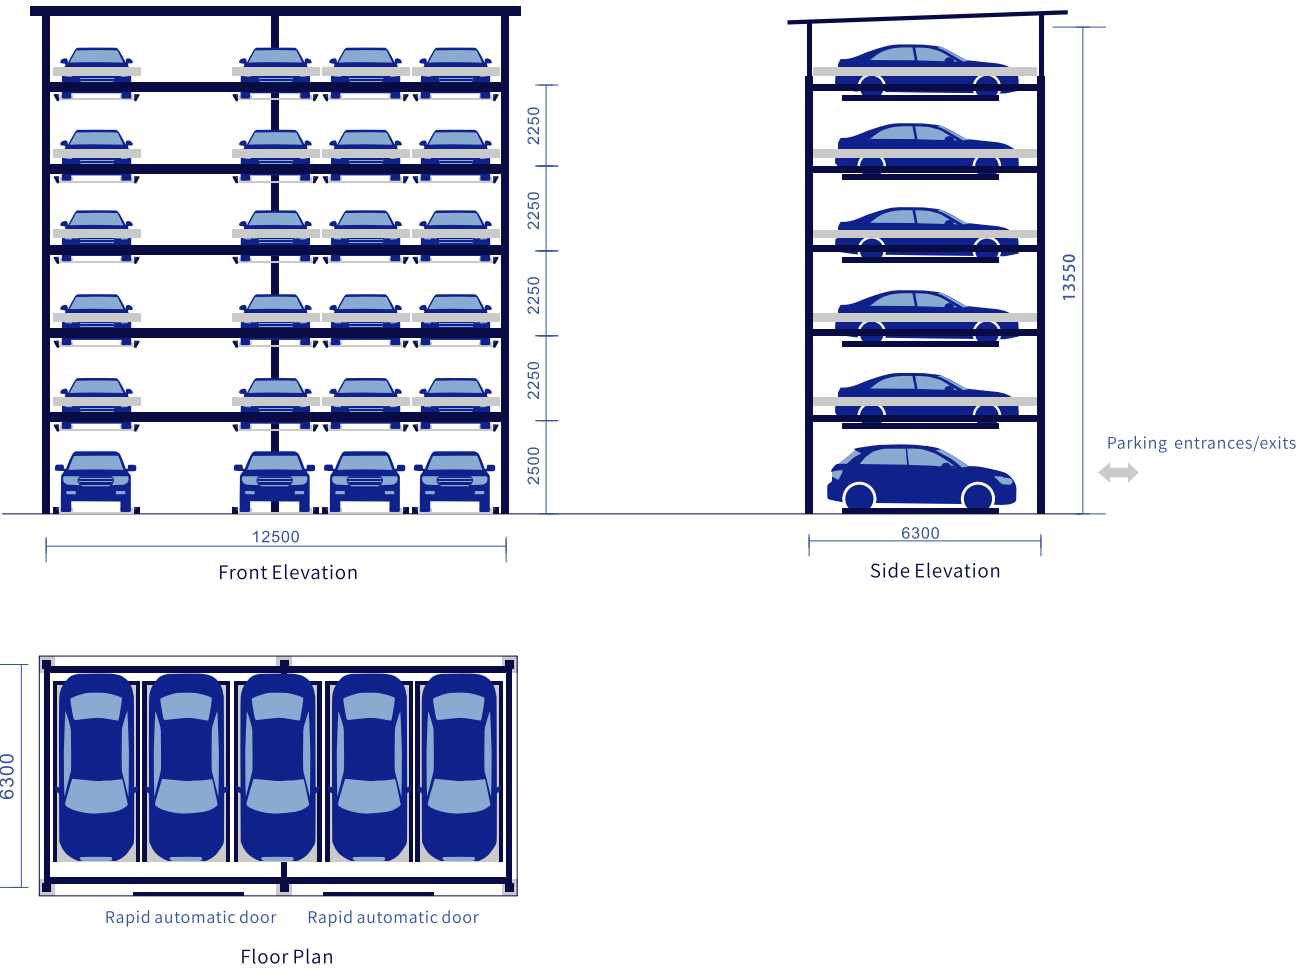

Vehicle Retrieval Time	Average 120 seconds

After-sales Service
售后服务

24/7 after-sales service

- Delivery only after load tests and smooth operation
- 12 months of free warranty;
- 24/7 technical support;
- Spare parts warehouses at local service centers;
- High-limit accident insurance with nationwide claims;
- u Professional O&M team with fully insured

Remote Intelligent Monitoring System

- Garage networked for HQ to monitor operating status;
- Customers can monitor garage status in real time from the office;
- It supports back-end equipment system upgrades;
- Fault alert notifications;
- Operational status summary reports.
